

OKONITE

NEW CABLE PLANT ANNOUNCEMENT

Coming soon to Orangeburg, South Carolina

The Okonite Company is excited to announce the groundbreaking of our newest Cable Manufacturing Plant in Orangeburg South Carolina. This state-of-the-art facility adds to Okonite's manufacturing dominance in the EPR insulated cable market and expands our manufacturing redundancy. Our dedication to customer needs across the Power Distribution sector is evidenced by this commitment to delivering premium quality products with optimized lead-times.

Located on the southern end of our 100-Acre Orangeburg South Carolina campus, this facility will complement our existing Orangeburg Cable Plant, capitalizing on its adjacency to our world-renowned EPR Compounding Plant.

This project takes a cutting-edge approach to integrating semi-automated production controls with advanced machinery systems, creating the synergy required to manufacture the highest quality product at an accelerated pace without compromise.
