C-L-X® VFD Type MV-90 or MC-HL

2.4 kV Okoguard® Nonshielded Power Cable-Aluminum Sheath

5000V CSA RA90

3 Okopact® (Compact Stranded) Copper Conductors/90°C Rating

100% and 133% Insulation Level

For Cable Tray Use-Sunlight Resistant-For Direct Burial

Insulation

Okoguard is Okonite’s registered trade name for its exclusive ethylene-propylene rubber (EPR) base, thermosetting compound, whose optimum balance of electrical and physical properties is unequaled in other solid dielectrics. Okoguard insulation, with the distinctive red color and a totally integrated EPR system, provides the optimum balance of electrical and physical properties for long, problem-free service.

Assembly

The Type MV-90 conductors are assembled with fillers and a binder tape into a round core. Three bare stranded copper grounding conductors, located in the outer interstices, is provided for grounding. A continuously corrugated welded aluminum sheath C-L-X encases the cable core. The C-L-X sheath is protected with a low temperature yellow Okoseal® (PVC) jacket. The impervious, continuous, corrugated aluminum C-L-X sheath provides complete protection against moisture, liquids and gases in addition to its excellent mechanical strength. In addition, the aluminum CLX sheath exceeds the equipment grounding requirements of NEC Section 250.118 and 250.122, and can be used as the equipment grounding conductor in non-HL areas. The overall Okoseal (PVC) jacket allows the cable to be direct buried in the ground, embedded in concrete or areas subjected to a corrosive atmosphere.

Applications

C-L-X power cables are recommended as an economical alternate to a wire in conduit system. They are designed specifically for use on feeders and branch circuits in industrial power distribution systems. C-L-X power cables may be installed in both exposed and concealed work, wet and dry locations, direct burial in the earth, or embedded in concrete. They may be installed on metal racks, troughs, in cable trays or secured to supports not greater than 6 feet apart. C-L-X power cables are also approved for Classes I, II and III, Divisions 1 and 2 and Class I, Zones 1 and 2 hazardous locations - NEC Articles 501, 502, 503 and 505.

Medium voltage Non-Shielded cables discharge normally in service when spacing between phases is non-uniform or when phases are in close proximity to a grounded surface.

Specifications

Conductors: Annealed uncoated copper compact stranded per ASTM B-496.

Strand Screen: Extruded semiconducting EPR strand screen meets or exceeds electrical and physical requirements of ICEA S-96-659/NEMA WC71 and UL 1072.

Insulation: Okoguard meets or exceeds the electrical and physical requirements of ICEA S-96-659/NEMA WC71 and UL 1072.

Phase Identification: Print color code (black, red and blue).

Grounding Conductors: Three uncoated copper Class B in accordance with UL 1072.

Assembly: Cabled with fillers and ground wires, in the interstices, binder tape overall.

Sheath: Close fitting, impervious, continuous, corrugated aluminum C-L-X per UL 1072. C-L-X is recognized as a grounding conductor by NEC.

Jacket: A low temperature sunlight resistant, yellow PVC jacket in accordance with UL 1072. Other color jackets are available. UL Listed as type MV-90 or MC-HL, sunlight resistant, for use in cable tray, and for direct burial in accordance with UL 1072 and 2225.

Product Features

• Tandem extruded, all EPR system.
• Complete prepackaged, color coded, factory tested wiring system.
• Okoguard C-L-X cables meet or exceed electrical and physical requirements of all recognized industry standards (UL, AEIC, NEMA/ICEA, IEEE).
• Passes the vertical tray flame test requirements of IEEE 383 and 1202, UL 1072, ICEA T-29-520(210,000 BTU/hr.)
• Complies with NEC Articles 300.50 and 310.10(F) for direct burial.
• Complies with NEC Articles 501, 502, 503 and 505 for hazardous locations.
• Continuous sheath provides grounding safety.
• Excellent corona resistance.
• Exceptional resistance to “treeing.”
• Stress cones not required.
• Minimum installation temperature of -40°C.
• Three symmetrical grounding conductors with the CLX sheath provide a superior low resistance return path for VFD and other modern ac drive/motor applications.
• ABS listed as CWCMC Type MC-HL.
• CSA listed as RA90, FT4, SR, HL, -40°C and 5000V.

**Notes:***

- **Authorized stock item.** Available from our Customer Service Centers.
- Copper or bronze and non-jacketed C-L-X is available on special order.
- Optional jacket types available - consult local sales office.

**Aluminum Conductors**

1. Aluminum conductors are available on special order.
2. Ampacities
   - Ampacities are in accordance with Table 310.71 of the NEC for an insulated three conductor cable, isolated in air, with a conductor operating temperature of 90°C and an ambient air temperature of 40°C.
   - Ampacities are in accordance with Table 310.75 of the NEC for a three conductor Type MV-90 or MC cable installed in uncovered cable tray in accordance with Section 392.13 of the NEC with a conductor operating temperature of 90°C and ambient air temperature of 40°C. Where the cable tray is covered for more than six feet with solid unventilated covers, the ampacities shall not be more than 95% of the values shown above.

- Ampacities are in accordance with Table 310.83 of the NEC for an insulated three conductor cable directly buried in the earth with a conductor operating temperature of 90°C, ambient earth temperature of 20°C, 100% load factor and thermal resistance (RHO) of 90.

Refer to the NEC, IEEE/ICEA S-135 Power Cable Ampacity Tables, or the Okonite Engineering Data Bulletin for installation in duct banks, other ambient temperatures, circuit configurations or installation requirements.
